

## The difference between potency and purity in drug products – Tips & Suggestions

**Please refer to the International Conference on Harmonization (ICH) guidelines for more detail.**

A quick definition would be:

–**Potency** is a measure of drug activity expressed in terms of the amount required to produce an effect of given intensity.

–**Purity** is a measure of the amount of API present in a sample compared to those of related substances, impurities, residual solvents, etc.
