

Can the Window Maker heating modules be used with either US or European voltage units – FAQ

The Window Maker units are currently produced with 110/120V voltage for use in US & Canada (cat# [07200-S](#)) and the replacement modules (cat# [07301-S](#), [07201-S](#), [07204-S](#), [07207-S](#)) differ only in size of the burn window and can be used with new and older Window Makers even if you have a discontinued unit with different voltages.
