

Equivalency study of syringe filters in-situ – White Paper

An unbiased study was conducted by a pharmaceutical company that compared market leading brands of syringe filters in situ to MicroSolv's AQ™ brand of syringe filters.

The results were that AQ™ (*Advanced Quality*) filters were not only the quality leader but can be purchased at quite a substantial cost savings. These syringe filters were designed for analytical Instrumentation with sample chemistry in mind so little to no adsorption occurs on the membranes. Click [HERE](#) for ordering information and pictures of AQ brand syringe filters.
