

## Do you have suggestions for a knitted reactor coils KRC with a volume of 0.375ml with an internal diameter of 0.5mm – FAQ

A 1 meter long knitted reactor coil with 0.5mm ID has a volume of 196 $\mu$ l. Therefore you would need 1.9 meter long coil.

As we do not offer a reaction coil with such length needed for 375 $\mu$ l volume, I suggest you purchase 8 meters of PTFE tubing with 0.2 mm ID (MTC catalog number [49210-20](#)) and make a coil from the tubing.
