## Are the Cogent TYPE-C Silica based stationary phases available as bulk materials?

No, the Cogent 4um and 2.0 TYPE-C Silica™ based stationary phases are not available as unpacked bulk material. TYPE-C Silica™ is a very unique material and to properly pack columns or capillaries requires proprietary technology. For this reason, it is only sold in a pre-packed column format. However, 10um particles can be made available upon request.
