

Do you have ISO or similar accreditation – FAQ

MicroSolv does not have formal accreditation, however we do follow standard operating procedures (SOP) for all of our processes, have a full quality assurance program in place, and have full documentation internally for all personnel to follow including our in house analytical and quality control laboratory.

It should be noted here that we have served the analytical laboratory industry successfully since 1992 providing quality, consistency and focus on a very excellent customer experience.
