

Are the Soft-Guard septa and caps compatible with LCMS or LCMS / MS – FAQ

Yes. The Soft-Guard™ septa will outperform most septa and caps on the market when used with most LCMS applications.

For very sensitive LCMS / MS applications we recommend our advanced quality, AQR™ brand septa and caps which is colorless, ultra-pure and designed for the most critical chromatography applications. The AQR™ cap incorporates all the benefits of the Soft-Guard technology as well.
