

## Expiration dates for Qualification Kits & Solutions - INTERNAL ONLY

### CONFIDENTIAL & FOR INTERNAL USE ONLY

Chemical Solutions gives a **2 year expiration** date at the time the solutions are made however they are **really good for about 3 years**. They have validated data to prove this. Our policy is not to ship anything with less than 6 months expiration as most customers consume these solutions in less time.

There is a date of manufacture **on the COA** with the expiration date. The customers can use this kit with **full confidence right up to the expiration date given**. To be compliant with industry standards, the solutions need an expiration date on these items in order to be GMP certified. Therefore, we cannot just label the bottles with the date of manufacture. Also, the customers do not like to get products with really long expiration dates either.

If a customer would like a **longer expiration date** than what we have available Chemical Solutions can prepare them with a 2 year expiration but the lead time could be up to **6-8 weeks** and will be treated as a **custom** item.
