

Do you have ISO or similar accreditation - FAQ

MicroSolv does not yet have formal accreditation, however we do follow standard operating procedures (SOP) for all of our processes, have a full quality assurance program in place, and have full documentation internally for all personnel to follow including our in house analytical and quality control laboratory.

As of June 2024, we have started the process of becoming ISO 9001-2015 certified. and are working with NC State University to help bring us to a successful program.
